

PBG.io Newsletter

What's New?

Over the past several weeks, we have been focused on enhancing [PBG.io](#) to deliver a more comprehensive and transparent experience for our community.

Key additions include the publication of the [PBG Whitepaper](#) and the [PBG DVP Audit Report](#) — resources designed to provide in-depth insights into our project's foundations, architecture, and security standards.

We invite you to explore the updated platform and deepen your understanding of how we are building the future of decentralized asset management — with transparency, integrity, and innovation at its core.

What's next?

PBG is developing a dedicated Affiliate and Promoter Program, specifically tailored for creators, influencers, and crypto advocates committed to advancing the future of decentralized finance.

In the coming weeks, we will introduce a new registration portal, enabling selected partners to join the PBG network. This program will provide an exclusive opportunity to collaborate directly with our team and access unique benefits, while supporting the broader adoption of decentralized vault portfolios.

If you are passionate about Web3, DeFi, and transparent digital asset management, we invite you to stay connected. Further details will be announced shortly.

Coming Soon: A Sneak Peek

We're excited to share that something new is on the way at [pbg.io](#) — we're working on building a bridge to expand your opportunities even further. Stay tuned for more details coming soon!

The Latest in Crypto & DeFi

U.S. Adds ADA to Strategic Crypto Reserve

On March 6, 2025, the U.S. Treasury officially added Cardano's ADA to the Digital Asset Stockpile (DAS), joining Bitcoin, Ethereum, Solana, and XRP. For PBG users, this signals growing institutional recognition of Cardano—the blockchain that powers our Decentralized Vault Portfolios (DVPs). ADA is essential for interacting with PBG Tokens, and its inclusion in the DAS reinforces Cardano's relevance in DeFi and blockchain-based finance.

ADA Shows Renewed Momentum Within Weekly Range

Cardano (ADA) is currently trading around \$0.7169, following a notable price increase from \$0.6856 in the last 24 hours. Over the past week, ADA has moved within a range of \$0.6548 to \$0.7359, reflecting renewed trading activity. Earlier in the month, it had touched a low near \$0.575. Current chart structures show higher lows forming beneath key resistance levels, which market observers often monitor to assess trend development.

U.S. Tariff Relief Spurs Tech & Crypto Rally

A recent tariff exemption on tech products like chips and computers—announced by President Trump—has temporarily relieved pressure on U.S. supply chains. The crypto market responded with bullish momentum, particularly among mining companies and blockchain-related assets. However, this reprieve may be short-lived, as the administration revisits its trade stance under Executive Order #14257.

PBG Spotlight

Our [Decentralized Vault Portfolios \(DVPs\)](#) represent a new standard in digital asset management — offering full asset ownership, on-chain transparency, and instant liquidity through the Cardano blockchain. Users define their strategy, and our smart contracts execute with precision.

Whether you are entering the world of digital assets for the first time or expanding an established portfolio, PBG.io empowers you to manage tokenized investment strategies with confidence and control.

As the world's first DVP protocol, PBG combines the security and transparency of blockchain technology with the sophistication of structured portfolio management. We are not only opening access to decentralized finance, but redefining how it is navigated — with clarity, integrity, and innovation at every step.

Did You Know?

Cardano is ~90,000 times more energy-efficient than Bitcoin.

As of 2022, Bitcoin's blockchain consumed up to 204.5 TWh (terawatt-hours) per year during peak usage—equivalent to the output of over 25 nuclear power plants.

In contrast, Cardano's Proof of Stake model consumes just 2.95 GWh (gigawatt-hours) annually—roughly 90,000 times less energy.

Discover the Future of Asset Management

PBG.io is redefining digital asset management with secure, transparent, and autonomous solutions.
